OIL, GAS & MINING**

June 10, 2015

To: Julie Carter, State of Utah Dept. of Natural Resources, Ruland J Gill, Jr and To Whom It May Concern:

Re: Request for Agency Action Docket No. 2015-020 Cause No. 139-134

As President of the Evans Oil & Gas LLC, and on behalf of the various members and managers, we would like to voice our objections to the request from Newfield Production Company, for agency action in regards to the Docket No. 2015-020 and Cause No. 139-134, so as to preserve any and all of our rights in regards to our existing Paid Up Oil & Gas Lease, and the existing oil production and royalties, and including any member/manager surface rights. At this time we neither know if these requested changes are either harmful or helpful. Our objection comes from the lack of any general and/ or specific information as to how the existing production of our section 25, versus the existing production of the proposed merger with section 36 is being handled pre and post- merger, as section 25 produces twice the barrels of oil of what the section 36 produces at this time. And as to what the mechanics and various triggers will be in place for any new wells drilled in the new proposed 1280 acre section of the combined section 25 and 36, and how will any of the new future wells production be allocated? We have been given no previous notice or information, other than the filed "request for agency action". Nor have we been contacted as to how our interests will be affected pre-merger, post-merger, or predrilling of new wells, and post drilling of any new wells. We simply ask that Evans Oil & Gas and any and all other lessor's be given a more specific informational package, to better understand the effects of this new pooling of sections, and their effect on the various lessor's, and that no unjust or unfair burdens or actions take place. We appreciate your considerations on behalf of our mineral interests and all other area Lessor's interests to be fully informed of these changes and the effect of those changes.

Thank you,

Julie Robinson
